122357866 Transport Processes and Separation Process

The current model of atomic structure is the quantum mechanical model. Traditional chemistry starts with the study of elementary particles, atoms, molecules, substances, metals, crystals and other aggregates of matter. This matter can be studied in solid, liquid, or gas states, in isolation or in combination. The interactions, reactions and transformations that are studied in chemistry are ...

Chemistry - Wikipedia

Catalysis is the process of increasing the rate of a chemical reaction by adding a substance known as a catalyst (/ ˈkætəlɪt ˈɛtɪs t /), which is not consumed in the catalyzed reaction and can continue to act repeatedly. Because of this, only very small amounts of catalyst are required to alter the reaction rate in principle. In general, chemical reactions occur faster in the presence of a ...
