Calculus (from Latin calculus, literally 'small pebble', used for counting and calculations, as on an abacus) is the mathematical study of continuous change, in the same way that geometry is the study of shape and algebra is the study of generalizations of arithmetic operations.. It has two major branches, differential calculus (concerning instantaneous rates of change and slopes of curves ...

In mathematics, a system of linear equations (or linear system) is a collection of two or more linear equations involving the same set of variables. For example, $x + y = 1$, $x + y + z = 2$, $x + y + z = 3$ is a system of three equations in the three variables x , y , z . A solution to a linear system is an assignment of values to the variables such that all the equations are simultaneously satisfied.
