Refrigeration is a process of removing heat from a low-temperature reservoir and transferring it to a high-temperature reservoir. The work of heat transfer is traditionally driven by mechanical means, but can also be driven by heat, magnetism, electricity, laser, or other means. Refrigeration has many applications, including, but not limited to: household refrigerators, industrial freezers ...

During the 1990s, my focus was almost entirely on analogue software, which became a priority (if not a panic) when it seemed, for a while, that analogue hardware might even be on its way out or, at the least,

completely marginalized.

With more rain and snow on the way, the supposed “unending drought” that the New York Times reported on last year has, in a matter of weeks, ended at least in Northern California. Yesterday’s color satellite imagery from NASA shows the dramatic changes which have occurred since the same date three years ago:

### Satellite Reveals End of “Unending” N. California Drought

The President of the European Academy of Sciences, Alain Tressaud and its Presidium invite you to the reception, organized on April 13th, 2018, at 11.30 a.m, to be held at the Fondation Universitaire in Brussels, for the occasion of the taking office of the new President Rodrigo Martins and the new Heads of Divisions and Officers.

### Eurasc - News

“The satellite imagery shows that the drought is over, and that the region is now green again. This is a great relief for the population and the economy. The European Academy of Sciences is pleased to see the progress of the region and the work of the new President and Heads of Divisions and Officers. We will continue to support the region and the Academy in its efforts to improve the environment and the quality of life for all.”
