Several Complex Variables Jaap Korevaar, Jan Wiegerinck j.j.o.o.wiegerinck@uva.nl ... 2.6 Laurent series in one variable with variable coefficients; removability of isolated ... who has made fundamental contributions to complex analysis in several variables, beginning about 1935, cf. [44].

Several Complex Variables

The theory of functions of several complex variables is the branch of mathematics dealing with complex valued functions (z, \dots, z_n) on the space \mathbb{C}^n of n -tuples of complex numbers. As in complex analysis, which is the case $n = 1$ but of a distinct character, these are not just any functions: they are supposed to be holomorphic or complex analytic, so that locally speaking they are power series in ...

the fascinating theory of several complex variables. Of course, there are notable exceptions, like the books of R.M. Range [9] or B. and L. Kaup [6], however, even those excellent books have a drawback: they

4 Sara W. Lapan Theorem 0.18. We can choose an R -basis such that Q can be replaced by: $0 @ I n + 0 0 0 0$
 $n 0 0 0 0 I n 1 A$. Also, $n + + n 0 = \max \dim E_j Q 0$ on E_g and $n + n 0 = \max \dim E_j Q 0$ on E_g . This is also true if Q is C -Hermitian.

theory of several complex variables are the features that differ from the one-dimensional theory. The one-dimensional theory is illuminated by several complementary points of view: power series, integral representations, partial differential equations, and geometry.
