Overview. State of Fear is, like many of Crichton's books, a fictional work that uses a mix of speculation and real world data, plus technological innovations as fundamental storyline devices. The debate over global warming serves as the backdrop for the book. Crichton supplies a personal afterword and two appendices that link the fictional part of the book with real examples of his thesis.

Global cooling was a conjecture during the 1970s of imminent cooling of the Earth's surface and atmosphere culminating in a period of extensive glaciation. Press reports at the time did not accurately reflect the full scope of the debate in the scientific literature. The current scientific opinion on climate change is that the Earth underwent global warming throughout the 20th century and ...
