worldviews have been faced with a new competitor: the scientific worldview (or, perhaps more precisely, scientific worldviews). The worldviews of traditional religion and that of modern science are often thought to be irreconcilable because modern science appears to contradict at least some of the core beliefs of each of the Abrahamic faiths.

World View, Metaphysics, and Epistemology

The apparent conundrum is that strictly scientific worldviews are amoral, while many long-held religious worldviews have proven unscientific. The way out of this conundrum is to recognize that nonscientific ideas, as distinct from unscientific ideas, are acceptable components of a scientific worldview, because they do not contradict science ...

It sometimes seems as if there are more philosophical and religious views than any normal person could ever learn about. Indeed, there are more than six thousand distinct religions in the world today. However, some people are surprised to find that the world's religions and philosophies tend to break down into a few major categories. These five worldviews include all the dominant outlooks in ...
