### Comparison of web frameworks - Wikipedia

A web framework (WF) or web application framework (WAF) is a software framework that is designed to support the development of web applications including web services, web resources, and web APIs. Web frameworks provide a standard way to build and deploy web applications. Web frameworks aim to automate the overhead associated with common activities performed in web development.

### Web framework - Wikipedia

I agree that there are a lot of great frameworks out there like Zend Framework and CakePHP. But from a learning point of view, the knowledge gained by writing your own framework is immense.
