

zeolites in industrial separation pdf

Zeolites are microporous, aluminosilicate minerals commonly used as commercial adsorbents and catalysts. The term zeolite was originally coined in 1756 by Swedish mineralogist Axel Fredrik Cronstedt, who observed that rapidly heating the material, believed to have been stilbite, produced large amounts of steam from water that had been adsorbed by the material.

Zeolite - Wikipedia

1. Introduction. Zeolites, glasses, carbons, and oxides are members of a large group of porous materials known as molecular sieves. Among these, zeolites are the most attractive candidates for industrial applications because of their unusual features.

Nanosized and hierarchical zeolites: A short review

Faujasite is a mineral group in the zeolite family of silicate minerals. The group consists of faujasite-Na, faujasite-Mg and faujasite-Ca. They all share the same basic formula: $(\text{Na}_2, \text{Ca}, \text{Mg})_{3.5} [\text{Al}_7 \text{Si}_{17} \text{O}_{48}] \cdot 32(\text{H}_2\text{O})$ by varying the amounts of sodium, magnesium and calcium. It occurs as a rare mineral in several locations worldwide and is also synthesized industrially.

Journal of the American Chemical Society (ACS Publications)

Polymeric gas-separation membranes were commercialized 30 years ago. The interest on these systems is increasing because of the simplicity of concept and low-energy consumption. In the refinery, gas separation is needed in many processes such as natural gas treatment, carbon dioxide capture, hydrogen purification, and hydrocarbons separations.

Polymeric Gas-Separation Membranes for Petroleum Refining

quaternized amine product made by the reaction of trimethylamine with the copolymer after chloromethylation. The Type 1 functional group is the most strongly basic functional group

SYNTHESIS OF CUMENE BY TRANSALKYLATION OVER MODIFIED BETA

The rapidly increasing population, depleting water resources, and climate change resulting in prolonged droughts and floods have rendered drinking water a competitive resource in many parts of the world. The development of cost-effective and stable materials and methods for providing the fresh water in adequate amounts is the need of the water industry.

A Review of Removal of Pollutants from Water/Wastewater

* Global warming is defined by the American Heritage Dictionary of Science as "an increase in the average temperature of the Earth's atmosphere," either by "human industry and agriculture" or by natural causes like the Earth has "experienced numerous" times "through its history."
